Jander, G., and Fischer, L.

ZINC DIETHYL AS A SOLVENT. II. CONDUCTIVITY INVESTIGATIONS (Über Zinkdiäthyl als Lösungsmittel. II. Leitfähigkeitsuntersuchungen). [1960] [15]p. 15 refs.

Order from SLA m\$2.40, ph\$3.30 61-10525

Trans. of Z[eitschrift für] Elektrochemie (West Germany) 1958, v. 62, p. 971-977.

The conductivity behavior of n-Bu₄Ni, Li ethyl, ZnI ethyl and AlBr₃ in Zn diethyl solutions was studied in relation to concentration at 20°C. The course of reactions of ZnI ethyl and AlBr₃ with Li ethyl or AlBr₃ with ZnI ethyl was studied conductometrically. The results corroborate the conclusions drawn in report No. 1. An evaluation based on material available to date would assign to Zn diethyl a kind of middle position, corresponding to its solvent properties, between the ionizing solvents on the one hand and the inert organic solvents on the other.
